28. Scope of Work

28.1 Project Description

Tracer is a protocol built to democratise derivatives (financial contracts that derive their value from one or multiple underlying assets) by vastly reducing the barriers to participate in derivative markets.

This protocol will be governed by a Decentralised Autonomous Organisation named the “Tracer Protocol DAO”, responsible for developing, deploying and managing the “Tracer Factory”, which can itself be used by users to deploy Tracer markets. The first type of derivative that will be supported by the Tracer protocol will be perpetual swaps (similar to futures and options contracts but without an expiration date).

Tracer is being developed by Tracer DAO, a collective composed of crypto-economists, open-source ideologues and other like-minded individuals working towards building technology to support a free and decentralised world.

Sigma Prime was approached by **Tracer DAO** to provide a security assessment of the smart contracts powering the Tracer protocol.

The detailed scope of this assessment is defined in Section 28.2

28.3 Proposed Timeline

This time-boxed engagement is expected to start on March 15th, 2021.

Security review and testing is expected to be completed by April 23rd, 2021.

28.4 Description of Services

The primary deliverable of this engagement will be a report-style document listing any vulnerabilities discovered during the security review.

This pricing expects a “two-round” security review, following this sequence:

1. Sigma Prime will be given access to the components to be security reviewed. At this point, Tracer DAO is to pay 100% of the engagement fee.
2. Sigma Prime will perform a security review on the agreed scope.
3. Sigma Prime will provide the security review results, in confidence, to Tracer DAO.
4. Tracer DAO will make any amendments, if required.
5. Sigma Prime will then perform a retesting of the vulnerabilities identified and update the initial security review to provide, for each vulnerability, either:
 - a. an indication if the issue has been fixed and comments on the fix, or
 - b. a comment from Tracer DAO as to why the issue does not require a fix.
6. Sigma Prime will present the final, updated security review to Tracer DAO in confidence. At this point.
7. Tracer DAO will be given the option to allow Sigma Prime to publish the report as-is, or for it to be kept confidential.
